

[ A:\Russia ]

Tom\_Sansone

This proxy war engineering started under the Obama/Biden Administration with Victoria Nuland midwifing the charge. It was probably designed to be executed during HRC's second term with rumbling anticipation assisting her re-election. Also by design likely included the bombing of Iran, when they would predictably support Russia with arms, providing the opportunity to close the sunset clause of the JCPOA which thus would have been a fraud analogous to the Minsk agreements. But, Trump jeopardized it all, first campaigning by wanting to get along with Russia which earned him a never ending RussiaGate. But Trump wasn't willing to wait until his second term to bomb Iran and probably was reluctantly on the Ukraine proxy war strategy himself so instead he unilaterally pulls out of the JCPOA to strangle it with sanctions and assassinating Soleimani to provoke a sufficient response for him and Netanyahu to bomb Iran. They didn't take the provocation bait. It backfired in Trump's face, bringing China in to Iran's rescue and thus the Middle East. This made Iran's foes nervous, thus enters the Abraham accords, essentially a US weapons deal dressed up as a peace accord. Trump tried to hijack the plan, by attempting to change public opinion on Putin, cutting Iran out of the plan, and demanding information on Biden corruption from Zelensky if he wanted the arms which the Minsk agreement fraud was funneling into Ukraine. But, that got Trump impeachment on top of the never-ending Russiagate. Why didn't Zelensky provide Trump with the dirt on Biden? Because he wanted the Nuland strategy to continue and probably was being told Trump won't make it to his second term if even through his first. Now, look, they still haven't stopped guaranteeing it.
